Shortly after that I saw a man by the name of Mr. Johnson, a man whom I know very well pointing towards my building. Shortly after that a crowd gathered around my place, men women and teenagers, ages fifteen years to sixteen years. They demanded that I should open the place. With fright and lives at stake, I had to open the place; I was compelled to. As soon as I did that they rushed in and started looting the goods finished and unfinished, ready made and those hanging on the line. They left the building and walked away. A woman who I know - I don't know if this is her correct name - Iris Fraser, shouted, 'You can't leave him you must beat him and burn him' They returned and started then to beat me, I tried to escape by going to the back of my yard, where a fellow by the name of Fitzroy gave me a few lashes with a paling

stave. ^{Jeep} Iris Fraser came and did the same with the paling stave. A man by the name of Miggins who works at the Aluminum Company gave me about four lashes on my left hip. Well, I was unable to move, I fell to the ground. I heard my wife and child shouting, 'The place on fire, the place on fire'

- Dr. Drayton: - Thank you Mr. Singh.
- Mrs. Mootoo: - You saw all these people with things in their hands?

Witness: - ^{Dr. Hamilton mentions nothing about rape. It possibly} Yes, ~~blows were the causes~~ could have been caused by ^{in rapid successive} blows or by blow alone.

Dr. Drayton: - This muscular atrophy could have been caused by a blow on the head which could have damaged the central nervous system?

Witness: - Yes. A blow on the head ^{would be} caused ~~nervous~~ ^{signs} ~~sights~~ ^{the central nervous system}.

Dr. Drayton: - When you examined him on the 3rd July, you said that he was suffering from conjunctival haemorrhage, having pain in the head, at that time, and also there were evidences of muscular wasting?

Witness: - He had wasting in the muscles of the ^{head} body.

- Dr. Drayton: - Was the wasting in the muscles separate from ^{the} that of the head?
- Witness: - Yes.
- Dr. Drayton: - But Dr. Denbow did not comment on the other aspect of Taharally. Was he cured?
- Witness: - It must have been cured.

- Chairman: - For fifteen minutes.
- Mr. Shepherd: - There are two or three Constables coming down to give evidence, but their launch has broken down, and they cannot be here this morning. I am hoping that they will be able to be here tomorrow to give their evidence.

Sheer Rahaman duly been sworn states as follows:

- Counsel: - Your full name is?
- Witness: - Sheer Rahaman.

- Counsel: - And you work as a medical practitioner at the hospital.
- Witness: - Yes Sir.
- Counsel: - And where are you residing?
- Witness: - In Georgetown, Middle Street.
- Counsel: - What lot?
- Witness: - 280 Middle Street.
- Counsel: - During May this year you examined several persons from the Wismar/Christianburg, Mackenzie area.
- Witness: - I had examined three cases and I have the record here.
- Counsel: - You have a record of their names and findings?
- Witness: - Yes, the first case is Mrs. Sheila Persaud, twenty three years of age. I saw her in the Casualty Ward of the Public Hospital, Georgetown at about 2:30 p.m. She gave a history of having been raped and assaulted the day before. On examination, she had an ^{operation} on the chin and the right side of her jaw and laceration on the ^{left} mandible region which ^{had to be sutured} ~~was to be~~ lacerated and there was also small laceration ^{under} on the right eye. On ^{vesicular} further examination ~~there~~ there was laceration of the ^{labia} ~~labia~~ minora and slight bleeding of ^{the} area. Wall of vagina, ^{and} the fornices appear normal. She had children before so I cannot tell of any actual damage.
- Counsel: - When was that it was on the 24th.
- Witness: - Yes. We did an ^{X-ray} ~~extra~~ on her and there was a ^{vesicular} cortical contusion on the right side of her Zygomatic-Temporal which ~~was sutured~~. Those were my findings.
- ^{Counsel}
~~Chairman~~ - But aside that, was anymore injury found?
- Witness: - She was subsequently admitted in the Ward where she had been seen by another doctor.
- Counsel: - Did he examine her?
- Witness: - Yes, I suppose so.
- Counsel: - At the time you carried out this examination you saw that the injuries were dangerous, depend on the severity of these injuries?
- Witness: - The injuries were serious.

Mr. P. Singh: - To whom was she referred to in the Ward?

Witness: - When the patient was seen in the casualty, she was sent to the ~~Gynaecology~~ ^{Gynaecology} Ward. In this case she was sent to the surgical ward.

Chairman: - Sorry to interrupt. Did you examine other cases?

Counsel: - Yes, you examined other cases.

Witness: - Another case was with Miss Ramrattie Persaud. She is twenty-one years of age. She was also seen in the casualty that day. On admission, she also alleged that she was

raped by men. On examination, she was conscious, she had ~~hematoma and abrasions on right side of the chin & both sides~~ ^{hematoma and abrasions on right side of the chin & both sides} Haematoma and abrasion to her neck. ~~The abrasion was found on the left forearm and in the perinium region.~~ ^{The abrasion was ~~found~~ ^{large abrasion between the} ~~found~~ ^{upper abrasion} on the left forearm and in the perinium region. Her}

history is one of rape. There was a ruptured Hymen which was bleeding. It was ~~recently~~ ^{ruptured} and it was recently ruptured.

~~There was a~~ ^{There was a} Small laceration, ~~part wall of the vagina.~~ ^{the posterior} There was also ~~a laceration on the posterior wall of vagina continuous with perinium.~~ ^{a laceration on the posterior wall of vagina continuous with perinium.} From that actually I concluded that she had been recently assaulted.

Counsel: - How would you speak about the danger to her health? Would you say that they were serious to health?

Witness: - One cannot really assume the danger of intercourse unless you know of the circumstances in which it is being done. There is no immediate danger.

Counsel: - On that score how would you be able to say whether that person was raped more than once?

Witness: - Well, no it is very difficult to say because one man can do the same damage on several different occasions.

Counsel: - You did not find any foreign matter in the vaginal part?

Witness: - No.

Counsel: - Yes Doctor your next case.

Witness: - The next case I saw was Doreen Sookram. She was fifteen years old. She also gave a history of alleged rape and assault. She was seen by me in the casualty. Many of ~~these~~ ^{these} findings ~~which I gave.~~ ^{They} were so many cases in the casualty that afternoon, they were just done without

any measure of thoroughness. But when they were admitted to the ward, they were more thoroughly examined. She was conscious and she had injury in her left elbow and a swollen wrist. The elbow was also swollen. There were abrasions under her chin. After general examination, I found she had a ~~at~~ torn posterior wall. There was a perforated hymen which I would say was recently perforated. I paid attention to this girl because she was so young and she seemed to be in agony and pain.

Counsel: - What were your observations Doctor?

Witness: - She seemed to be very nervous as if she had been undergoing a terrible nervous strain, probably a reaction from the day before. She was actually admitted to the ward and she had to be sedated.

Counsel.
Mr. P. Singh: - Were there any other cases?

Witness: - Those were all the cases. Those girls they had to be taken to the operation theatre, where ^{the} curi~~age~~ had to be done.

Mr. P. Singh: - You said that you had to make internal examinations on Shiela Persaud, she was treated and sent to the ward. What were the findings of Dr. Mitra's ^{ultra} X-Rays, she was examined in the Ward. She was found to be raped and assaulted by a group of negroes.

Witness: - That's right. She also complained of pains throughout her body, bleeding through her vagina, abrasions on the chest and chin.

Mr. P. Singh: - What are the X-Rays findings? Any bones fractured?

Witness: - No.

Mr. P. Singh: - What would be the effect on a girl of fifteen who was raped?

Witness: - It might affect her. It depends on the nature of the person. She was sedated for two days.

Mr. P. Singh: - What was the condition of Ramrattie Persaud?

Witness: - She was nervous. What I saw that they were going through a nervous strain because they were so innocent and ^{young} pretty.

Dr. Drayton: - Do you think that any other thing besides the male organ

could have caused these lacerations?

Witness: - Yes. The injuries to the vagina could have ^{been} caused by the male organ or something being forced higher.

Mrs. Mootoo: - Could Mackenzie hospital have treated these cases?

Witness: - I am not aware of the Mackenzie situation.

Mrs. Mootoo: - How were these cases sent to you?

Witness: - I understand by launch.

Mrs. Mootoo: - You think that they were in serious conditions?

Witness: - They were bleeding.

Mrs. Mootoo: - Did it look as if they could have been kept in the Hospital at Mackenzie?

Witness: - I don't think so.

Mrs. Mootoo: - For X-Rays?

Witness: - I didn't know if they had X-Rays.

Mrs. Mootoo: - If you were at Mackenzie would you have kept the patients or sent them to Georgetown?

Witness: - I don't know if I can answer that question. I am not acquainted with Mackenzie hospital.

Mrs. Mootoo: - Were they bleeding?

Witness: - Yes they were bleeding.

Mrs. Mootoo: - But was it wise to send these three women to Georgetown without any doctor to accompany them?

Witness: - I won't say so.

Chairman: - Do you know if these three women received medical aid before they reached you?

Witness: - I was told so.

Chairman: - Did you see any signs of medical treatment?

Witness: - No.

Mr. P. Singh: - Would you have expected to see signs of treatment?

Witness: - Yes.

Mrs. Mootoo: - If they were bleeding why is it they had travelled down from Mackenzie? Could they not have been treated at Mackenzie?

Witness: - I do not know the facilities at Mackenzie hospital.

Mrs. Mootoo: - But although this girl was treated at Mackenzie hospital

yet, when she came to Georgetown she was bleeding?

Witness: - Apart from having intercourse, if a young girl has never had sexual intercourse and had been sexed she would bleed a lot as a case I had not very long ago. A young girl just married has never had sex before and she went home to her husband. After intercourse she bled all the night until next day. It could arise from shocks and injuries.

Chairman
Mrs. Mootoo: - I see.

Dr. Drayton: - And in this case this is what happened to this girl, Doreen Sookram?

Witness: - Yes, Sir.

Dr. Drayton: - They came down on the 26th by M.V. Barina.

Witness: - I think so.

Dr. Drayton: - In the public hospital there were several serious injuries on that day?

Witness: - Yes they were.

Chairman: - Doctor, was Ramrattis operated on subsequently? She gave evidence that she was operated on later.

Witness: - Do you mean as far as her injuries were concerned immediately after admission?

Chairman: - She said she underwent an operation subsequently. How many days after?

Witness: - She had this operation about seven days after.

Chairman: - And that is for what?

Witness: - For *Dad. e.*

Chairman: - Doctor, I wonder if you can make these records available, that we can refer to them in our deliberations.

Witness: - As a matter of fact, I have them here. Two of these were referred to specialist of the hospital, Dr. Johnson and Dr. Das Gupta, who said that a patient said she had trouble with her ears that sand was stuck in both ears.

Chairman: - Thank you.
