

After being out of service for some six years, the **Lady Janet** is finally up and running and will soon serve residents in the Upper and Lower Pomeroon area. Residents will soon be able to experience a significant improvement in the delivery of oral health care services, following the re-commissioning of the dental boat on Monday.

The fully equipped facility will be managed by Senior Dental Surgeon, Sabriea Harrychan, who will be assisted by a Dentex and Dental Assistant. Present at the simple ribbon-cutting ceremony at Charity Waterfront were Minister of Health, Dr Frank Anthony; Minister of Local Government and Regional Development, Nigel Dharamlall, and other officials.
